

First News Briefs for June 5, 2013

Wireless Week Staff

With hurricane season coming, **C Spire Wireless** today announced that it will waive the one-time activation charge and monthly service fee for Wireless Priority Service (WPS), which gives eligible emergency response agencies and personnel a higher priority connection to its mobile communications network during a crisis or natural disaster.

Sanwire Corporation, a global provider of wireless communications services and data solutions, today announced its wholly owned subsidiary, iTerra Technologies Inc., has established an Advisory Board and the appointment of two seasoned coal mining professionals, George Naylor and John Sisk. The newly appointed Advisory Board members will help position iTerra's underground mine communication and mine safety solutions in the coal mining market in the United States.

SD Association today announced the addition of the Single Wire Protocol (SWP) to support Near Field Communications (NFC) features and facilitate the introduction of new business models that allow for a Secure Element to the microSD memory card.

SOBERLINK, Inc., a technology company based in Southern California, has developed a discreet, wireless breathalyzer for secure remote alcohol monitoring. SOBERLINK's handheld device monitors sobriety by automatically sending breathalyzer results to a cloud-based website for review.
