

FirstNews Briefs: Samsung Electronics, Inside Secure, Nokia, Wilson Electronics

Wireless Week Staff

Samsung Electronics introduced Galaxy Tab3 Lite (7"), which aims to combine the Galaxy Tab3 series with a slimmer, more portable design. The budget tablet features a 1.2GHz Dual Core processor and a 3600 mAh battery. Details on price and availability were not immediately available.

Inside Secure today announced it has upgraded its SafeZone FIPS software cryptographic module to improve security for a broad array of smart connected devices. Inside's enhanced SafeZone cryptographic software enables developers to build FIPS 140-2 certified applications for Trusted Execution Environments (TEE) based on ARM TrustZone frameworks.

Nokia today announced it will publish its fourth quarter 2013 and full year 2013 results report on Thursday January 23, 2014 at approximately 1pm Finnish time (CET+1). The report will be made available on the Nokia website immediately after publication.

A signal booster from **Wilson Electronics**, LLC was named Wireless Product of the Year by the TechHome Division of the Consumer Electronics Association (CEA). Wilson's CI 2070 in-building signal booster was recognized as part of the CEA's 2014 Mark of Excellence Award, which recognizes the best in custom integration and installed technology.
