

## **FirstNews Briefs: Digicash, Lookout, D-Link, Direct Beam, By Light**

Wireless Week Staff

The bank-led mobile payment scheme **Digicash** has launched a pilot-project using the Beacon model in Luxembourg. Digicash Beacon devices at the point of sale combine Bluetooth, NFC and QR Code technologies. For payers, this new feature is integrated with Digicash Apps that are issued by retail banks. Payments are made using SEPA Credit Transfers straight from the payer's current account.

**Lookout** today launched "Private Parts," an open-sourced, customizable toolkit to help developers implement visual, user-friendly privacy policies. It's available beginning today.

**D-Link**, in collaboration with **Direct Beam**, a global supplier of wireless software and technology, today announced the availability of new fixed LTE wireless routers. The indoor and outdoor routers are designed to provide performance for subscribers and reduced installation setup time for service providers.

**By Light Professional IT Services, Inc.**, a provider of secure wireless networking solutions for Federal Civilian Agencies, Law Enforcement and the Department of Defense, has recently completed the design, implementation and integration of the Department of Justice's Executive Office for United States Attorneys (EOUSA) Enterprise WLAN. The effort, accomplished in a 12 month period, consisted of site surveys followed by the installation/implementation at 240 EOUSA offices and 3 Data centers nationwide.
