

Volvo Taps AT&T for In-Car Connectivity

Andrew Berg

AT&T has signed a multi-year agreement with Volvo to provide connectivity to Volvo's vehicles.

According to a press release, AT&T will power Volvo's 2015 model year connected car solution with Sensus Connect, an embedded infotainment service.

Volvo customers in the U.S. and Canada will also have access to Volvo On Call, a service that allows remote access to car functions and an emergency crash notification service.

Volvo plans to enable cars with AT&T on-board for sale this summer

AT&T's Single SIM solution is paired with AT&T Control Center from Jasper Wireless.

In January, AT&T [announced](#) [1] deals at CES to partner with Tesla and Audi on in-car connectivity.
