

FirstNews Briefs: Mavenir Systems, iPass, Orange, Cloud4Wi

Wireless Week Staff

Mavenir Systems, a provider of software-based network solutions for mobile services, today announced the establishment of a Next Generation Operations Centre in Paris, France to support Voice over LTE (VoLTE) and Rich Communications Services (RCS) deployments.

iPass Inc., a provider of mobile services for enterprises and telecom service providers, launched its cloud-based Business Traveler Service 2.0., marking iPass' transformation into a cloud company utilizing a Software-as-a-Service delivery model and automation techniques, coupled with an app based approach.

Orange is launching the 2014 edition of the Orange African Social Venture Prize. A new category has been introduced for the fourth edition: the "Orange Partner" award will recognize the best project that integrates an Orange application.

Cloud4Wi, a provider of cloud Wi-Fi solutions, has released a new software development kit (SDK) to enable third-party developers to design apps for its Wi-Fi marketplace platform, expanding the ecosystem of Wi-Fi monetizing solutions and delivering greater network value to organizations with Wi-Fi offerings.
