

FirstNews Briefs: NetZero Wireless, Visage Mobile, Kitchen Brains, Nexmo

Wireless Week Staff

NetZero Wireless, Inc., a subsidiary of United Online, Inc., today announced that it has expanded its NetZero DataShield WiFi security service to include Android devices. NetZero DataShield, which launched for PCs, Mac computers, iPhone phones and iPad tablets in July of 2013, encrypts and protects users' data when they connect to the Internet via any WiFi connection, including public WiFi hubs.

Visage Mobile, a company focused on wireless expense management, data and analytics, today announced the launch of International Travel Roaming Alerts. Coming soon to the Concur App Center and available now through Concur TMC Preferred partners, International Roaming Travel Alerts will notify travel and mobility managers to potential wireless and mobile spend overages before international travel takes place.

Kitchen Brains, a provider of development and deployment of integrated, end-to-end, wireless M2M networking solutions, and SaaS applications for the commercial kitchen announced the release of SCK Food Safety Manager (FSM) today. The SCK Food Safety Manager (FSM) aggregates data from an array of static and handheld sensors along with data collection devices to ensure and enable HACCP compliance in any foodservice or preparation environment.

Nexmo, a cloud communication API company, is announcing its expansion into China and a strategic partnership with **21Vianet**.
