

FirstNews Briefs: Huawei, NXP, T-Mobile, Tangoe, SpiderCloud

Wireless Week Staff

Huawei and **NXP Software** have agreed to deploy LifeVibes VoiceExperience into Huawei LTE phones. The Huawei new LTE phones including G660, G730 and G620 will be the first global Huawei LTE devices using LifeVibes VoiceExperience on the Qualcomm Hexagon platform. The phones are launching in China with China Mobile, China Unicom and China Telecom, and in Europe with Vodafone, Orange and T-Mobile.

T-Mobile announced that starting today through June 15, customers can get up to \$100 off some tablets, including the newest addition to T-Mobile's growing tablet line-up, the LTE **Samsung** Galaxy Note 10.1-2014 Edition.

Tangoe, Inc., a global provider of Connection Lifecycle Management (CLM) software and related services, today announced the launch of its Cloud Advisory Service, which is designed to help enterprises assess and manage their cloud investments. With the Cloud Advisory Service, organizations receive an objective assessment of their cloud environments to help them make decisions around current and future investments, control costs, and minimize risks.

SpiderCloud Wireless, Inc., a provider of scalable small cell Enterprise Radio Access Network (E-RAN) systems, today announced findings from ongoing LTE trials with mobile operators. The LTE trials used the SCRN-310 dual-band 3G/LTE Radio Node, where Radio Nodes were deployed in-building. The findings of the new LTE trials show performance reliability results consistent with similar 3G small cell test results released 12 months ago: Average Call Setup Success Rate of 99.5%; Call Drop Rate 0.4%; Intra-E-RAN Hand-over Success Rate 99.9%; Downlink average throughput of 56.5 Mbps.
