

Refining Media Delivery Intelligent Caching Comes of Age

Submitted by Guest (not verified) on Mon, 11/29/2010 - 1:27pm Juniper Networks

New solutions are emerging, purpose-built to address business models and network constraints while also providing a path toward very high scalability. One of the more elegant and efficient solutions is Juniper Networks' Media Flow technology. An example near the end of this white paper shows potential cost savings from intelligent caching can easily exceed several million US dollars.
