

Managing the Mobile Broadband Challenge of 'Data Everywhere' - Do's and Don'ts of Lessons Learned from Over 100 Commercial Deployments

Submitted by bobrien on Mon, 01/07/2013 - 8:56am Openwave Mobility

As mobile operators are shifting from network-oriented to subscriber-defined business models, the fundamental challenge consists of breaking the old paradigms to properly execute their user data consolidation transformation. Learn about the fundamental do's and don'ts to effectively manage the 'data everywhere' challenge. This whitepaper outlines lessons learned from over 100 commercial deployments of Openwave Mobility's directory technology.
