

## **Converging Telecom & IT in the LTE RAN**

Submitted by jbarrett on Fri, 02/15/2013 - 10:24am Samsung

With LTE transforming mobile communications, this Heavy reading whitepaper discusses the need for operators to create "content-centric networks". Specifically, it looks at how by deploying IT technology in the RAN and locating memory, compute, application logic and content closer to the user, operators are able to redesign service platforms to meet and stimulate demand for richer, more sophisticated services.
